Louisiana Laws and Procedures Exam

Scoring Procedures

Scores are calculated based on the number of correct responses within an examination. Credit is given for correct responses while no points are received for incorrect responses. Consequently, candidates should answer each question because there is no penalty for guessing. Note that only one response should be marked for each question because questions that contain two or more marked responses or with blank responses (i.e., omitted questions) are scored as incorrect responses.

References

The exam questions are primarily developed from one or more of the references listed below. It is to your advantage to spend time learning and reviewing the relevant material.
