Practice of Land Surveying—defined in R.S. 37:682. The board recognizes that there exists a close relationship between land surveying and some areas of engineering, with some activities common to both professions; however, survey work related to property boundaries must be performed under the responsible charge of a professional land surveyor. Presented below are guidelines which shall be used as an aid in determining the types of surveying services which may be rendered by professional land surveyors or professional engineers.

a. – b.viii. ...

c. Surveying and mapping functions which do not require the establishment of the relationship of property ownership boundaries must be performed by or under the responsible charge of either a professional engineer or a professional land surveyor. Such surveying and mapping functions include:
