8-hour Life Safety Code Seminar Registration

**ACEC/L**
The Spec Sheet

---

**2014-2015 LAPELS BOARD**
(L to R): Paul Hale, PhD, PE; Alan Krouse, PE; Ali Mustapha, PE; Chris Knotts, PE; Ernie Gammon PLS; Scott Phillips, PE, PLS; Ted Thompson, PE; David Patterson, PLS; John Irving, PE; Kevin Crosby, PE, PLS;
Not pictured: Billy Moore, PE
The LAPELS Board and staff are always busy with duties designed to “safeguard the life, health and property, and promote the public welfare.” Consequently a lot has taken place over the past few months that should be of interest to our licensees.

New Board Members. As is noted elsewhere in this issue of the Louisiana Engineer and Surveyor Journal, Governor Jindal has appointed two new Board members to replace Jim Bowie and Miles Williams, whose terms expired on March 31. Many of you are no doubt already familiar with Scott Phillips, PE, PLS, and Alan Krouse, PE. Their biographical sketches are contained herein, but I’d like to add that both are exceptionally astute, experienced, hard-working individuals who have already proven to be assets to the Board.

2014 Legislative Session. In conjunction with the efforts of LES and LSPS, the Board monitors proposed legislation that may affect the practices of engineering and surveying in Louisiana. To our knowledge, no legislation was passed in the 2014 legislative session that would have a negative impact on the operation of the Board or on the professions that we regulate. We were gratified to observe the deferral (retraction and/or defeat) in committee hearings of several bills that we believe would have adversely affected our ability to protect the safety and welfare of the public.

Rule Changes. The board has approved a rule change that will “decouple” the examination and experience requirements for licensure as a Professional Engineer. The rule change, which has been published in the Louisiana Register and took effect on July 21, 2014, allows professional engineer applicants to take the NCEES Principles and Practices exam at any time after becoming certified by LAPELS as an Engineer Intern.

In the past, Engineer Interns have been required to fulfill the Board’s experience requirements prior to taking the Principles and Practices exam. The new rule will conform to the NCEES Model Law, to NSPE’s recommendations on this matter, and to the requirements that are currently in place in a number of other states.

It should be noted that irrespective of the date on which an engineer applicant takes the Principles and Practices exam, he must provide references attesting to his “good character and reputation,” and must attain four years of “progressive engineering experience in work acceptable to the board,” prior to applying for licensure as a PE.

Declaratory Order. The Board approved at its March, 2014 meeting a declaratory order that addresses the use of the term Structural Engineer. The full text of the declaratory order, which was developed in response to a request from a licensee, can be found on the Board’s website (www.lapels.com). The following is a summary of the Board’s position:

“Only professional engineers who are listed by the Board in the discipline of structural engineering shall be permitted to use the designation “Structural Engineer” or “S.E.” in conjunction with their name on letters, business cards or other forms of communication. However, it is acceptable for professional engineers to describe their structural engineering expertise if that is an area of their in which they can demonstrate competence (e.g., “Expert in Structural Engineering,” etc.), even if they are not listed by the Board as Structural Engineers.

Meeting with Engineers Nova Scotia. Engineers Nova Scotia is the licensing board for the approximately 6000 Professional Engineers and Engineer Interns who practice in Nova Scotia. Pursuant to discussions that took place at the 2013 NCEES annual meeting, Engineers Nova Scotia invited three LAPELS representatives to attend their July 23-24 meeting in Digby, Nova Scotia.
MESSAGE FROM THE CHAIRMAN, continued from page 3

By the time you read this, Emeritus member Sonny Launey, Board Treasurer Billy Moore and Executive Director Donna Sentell should have returned from the meeting. The initial impetus for the invitation was based on the cultural ties and heritage shared by southwest Louisiana and Acadia. The invitation was extended with several objectives in mind.

The first was to “explore the possibility of creating a closer linkage” between the two Boards, as a means of sharing their heritage and encouraging greater professional mobility between the two jurisdictions. The second was to open a dialogue on topics such as Industrial Licensure and the NCEES Model Law.

Dr. Mark Zappi, Dean of Engineering at the University of Louisiana-Lafayette, was also an invited guest. He and the Dean of Engineering at Dalhousie University were scheduled to discuss establishing an exchange program between the two schools.

DISCIPLINARY AND ENFORCEMENT ACTIONS

Tyson Ducote, Compliance Investigator

The Board continues to investigate alleged violations of the laws and rules which regulate the practice of engineering and land surveying in Louisiana. Substantiated violations result in disciplinary or enforcement action being taken either through a Consent Order or by Board Decision following a formal hearing at which the respondent is adjudged guilty of one or more violations. Below is a summary of the disciplinary/enforcement actions taken by the Board since the previous issue of the Journal.

UNLICENSED OFFER AND/OR PRACTICE OF ENGINEERING OR LAND SURVEYING:

Synergy L.L.C., an unlicensed firm which subsequently became licensed effective July 2, 2013 (EF–5372), was subject to enforcement action by the Board for offering to practice engineering and using the word “engineering” in connection with a person’s name or form of business or activity in Louisiana without proper licensure in violation of La. R.S. 37:681 and 37:700(A)(1), (7) and (9), to wit LAC Title 46:LXI§2301(B)(1). Between May 2009 and June 2013, the firm represented on its website that it was an “engineering firm specializing in energy management”. The firm has entered into a Consent Order with the Board, wherein it admitted to the referenced violations and agreed to pay a fine of $1,000; to pay administrative costs of $474.50; and to the publication of the Consent Order on the Board’s website, the printing of a summary of this matter by name in this publication, and the reporting of this matter by name to NCEES.

Ferrell Engineering, Inc., an unlicensed firm which subsequently became licensed effective March 13, 2014 (EF–5484), was subject to enforcement action by the Board for offering to practice engineering and using the word “engineering” in a person’s name or form of business or activity in Louisiana without proper licensure in violation of La. R.S. 37:681 and 37:700(A)(1), (7) and (9), to wit LAC Title 46:LXI§2301(B)(1). Between 2009 and 2013, the firm admittedly provided engineering services on 15 projects in Louisiana. The firm has entered into a Consent Order with the Board, wherein it admitted to the referenced violations of the above laws/rules and agreed to pay a fine of $2,500; to pay administrative costs of $428.12; and to the publication of the Consent Order on the Board’s website, the printing of a summary of this matter by name in this publication, and the reporting of this matter by name to NCEES.

I’d like to close this report with a reminder that LAPELS Board meetings are open to the public. If you have information you would like to present to the Board during the Public Comment period, or if you would simply like to observe our deliberations, you are certainly welcome to do so.
MUTLIPLE LAWS/RULES VIOLATIONS:

**Gregg S. Perkin, PE**, a licensed engineer (PE–23587), was subject to disciplinary action by the Board for (a) unknowingly aiding or assisting another person in violating the laws and/or rules of the Board in violation of La. R.S. 37:698(A)(12) and (b) unknowingly failing to properly seal an engineering document that has been issued by the licensee as completed work in violation of La. R.S. 37:698(A)(6), to wit LAC Title 46:LI§2701(A)(4)(a)(ii). In 2012, Engineering Partners International, Incorporated, a licensed firm whose license has been in an expired status since 2004, unknowingly practiced and/or offered to practice engineering in Louisiana by (a) preparing and issuing to clients in Louisiana an engineering report related to a drilling rig which it had inspected in Louisiana and (b) conducting business in Louisiana through its firm name. Mr. Perkin was an owner, officer and employee of the firm. Additionally, in 2012 Mr. Perkin unknowingly failed to properly seal the referenced engineering report related to the drilling rig which he had inspected in Louisiana. The report detailed the findings of Mr. Perkin during a forensic investigation and analysis of industry practices relating to the cause of an accident occurring on the drilling rig at the time it was located in Texas. Mr. Perkin’s inspection of the drilling rig in Louisiana occurred after the accident. At the time he prepared and issued the report, Mr. Perkin in good faith did not believe that the report was an engineering report. Mr. Perkin has entered into a Consent Order with the Board, wherein he admitted to the referenced unknowing violations of the above laws/rules and agreed to pay a fine of $1,000; to pay administrative costs of $681.81; to successfully complete the Board’s online Louisiana Laws and Rules Quiz; to immediately cease and desist in aiding or assisting the firm in violating the laws and/or rules of the Board; to faithfully conduct the Board’s website, the printing of a summary of this matter by name in this publication, and the reporting of this matter by name to NCEES.

**Marshall T. Ferrell, PE**, a licensed engineer (PE–26204), was subject to disciplinary action by the Board for aiding or assisting another person in violating the laws and/or rules of the Board in violation of La. R.S. 37:698(A)(12). Between 2009 and 2013, Ferrell Engineering, Inc., an unlicensed firm, admittedly provided engineering services on 15 projects in Louisiana. The firm subsequently became licensed effective March 13, 2014 (EF–5484). Mr. Ferrell was an owner and the President of the firm. Mr. Ferrell is now the supervising professional of the firm. Mr. Ferrell has entered into a Consent Order with the Board, wherein he admitted to the referenced violations of the above laws/rules and agreed to pay a fine of $2,000; to pay administrative costs of $428.12; to successfully complete the Board’s online Louisiana Laws and Rules Quiz; to successfully complete the Board’s online Louisiana Professionalism and Ethics Quiz; and to the publication of the Consent Order on the Board’s website, the printing of a summary of this matter by name in this publication, and the reporting of this matter by name to NCEES.

PRACTICE WITH AN EXPIRED LICENSE:

**Engineering Partners International, Incorporated**, a licensed engineering firm (EF–2055), was subject to disciplinary action by the Board for practicing and/or offering to practice engineering in Louisiana with an expired license in violation of La. R.S. 37:698(A)(9) and (16). The firm’s license was in an expired status since October 1, 2004 and during this time period the firm unknowingly practiced and/or offered to practice engineering in Louisiana by (a) preparing and issuing to clients in Louisiana an engineering report related to a drilling rig which it had inspected in Louisiana and (b) conducting business in Louisiana through its firm name. The firm has entered into a Consent Order with the Board, wherein it admitted to the referenced unknowing violations of the above laws/rules and agreed to pay a fine of $4,000; to pay administrative costs of $681.81; to pay past unpaid renewal fees of $180.00; to successfully complete the Board’s online Louisiana Laws and Rules Quiz; to successfully complete the Board’s online Louisiana Professionalism and Ethics Quiz; and to the publication of the Consent Order on the Board’s website, the printing of a summary of this matter by name in this publication, and the reporting of this matter by name to NCEES.

**AIDING OR ASSISTING ANOTHER PERSON IN VIOLATING LAWS/RULES OF THE BOARD:**

**Everett J. Pastureau**, an engineer intern (EI–19234) whose certification has been in an expired status since April 1, 2008, was subject to disciplinary action by the Board for aiding or assisting another person in violating the laws and/or rules of the Board in violation of La. R.S. 37:698(A)(12). Between May 2009 and June 2013, Synergy L.L.C., an unlicensed firm, represented on its website that it was an “engineering firm specializing in energy management”. The firm subsequently became licensed effective July 2, 2013 (EF–5372). Mr. Pastureau was an owner, employee and the President of the firm. Mr. Pastureau has entered into a Consent Order with the Board, wherein he admitted to the referenced facts and agreed to pay a fine of $250; to pay administrative costs of $474.50; to successfully complete the Board’s online Louisiana Laws and Rules Quiz; to successfully complete the Board’s online Louisiana Professionalism and Ethics Quiz; and to the publication of the Consent Order on the Board’s website, the printing of a summary of this matter by name in this publication, and the reporting of this matter by name to NCEES.

**Marshall T. Ferrell, PE**, a licensed engineer (PE–26204), was subject to disciplinary action by the Board for aiding or assisting another person in violating the laws and/or rules of the Board in violation of La. R.S. 37:698(A)(12). Between 2009 and 2013, Ferrell Engineering, Inc., an unlicensed firm, admittedly provided engineering services on 15 projects in Louisiana. The firm subsequently became licensed effective March 13, 2014 (EF–5484). Mr. Ferrell was an owner and the President of the firm. Mr. Ferrell is now the supervising professional of the firm. Mr. Ferrell has entered into a Consent Order with the Board, wherein he admitted to the referenced violations of the above laws/rules and agreed to pay a fine of $2,000; to pay administrative costs of $428.12; to successfully complete the Board’s online Louisiana Laws and Rules Quiz; to successfully complete the Board’s online Louisiana Professionalism and Ethics Quiz; and to the publication of the Consent Order on the Board’s website, the printing of a summary of this matter by name in this publication, and the reporting of this matter by name to NCEES.
ALAN D. KROUSE, PE

Mr. Krouse earned a Bachelor of Science in Civil Engineering in 1977 from Louisiana State University and obtained his Professional Engineering License in 1981.

He began his career at LADOTD in 1977 in the Road Design section. While in the Road Design section Alan worked on numerous projects including sections of US 61, US 90, and LA 15. Also, during his tenure in the Road Design section, Alan was the Assistant Urban System Coordinator and a Consultant Coordinator. Work in these assignments included managing projects in all the major metropolitan areas, all of I-49 in Shreveport, and sections of I-49 north of Alexandria. After eight years at LADOTD Alan left the Department and went to work in private practice. During his career in private practice he continued working as a road design engineer. Alan has also been involved with many projects designed for the Port of South Louisiana and the Port of Lake Providence. Alan has worked for Meyer and Associates, Shaw and owned his own firm. He presently is a Senior Staff Engineer with Buchart Horn, Inc. in Baton Rouge.

Throughout his career, Alan has remained active in professional organizations. He has been a member of the La. Engineering Society for over twenty five years and has held every office at the local and state level. Alan served as State President in 2008-2009 and 2012-2013. He is a Fellow Member of the National Society of Professional Engineers, a member of ASCE and currently the president of the Louisiana Engineering Foundation.

In his community Alan served on the Ascension Parish Planning and Zoning Commission for four years including two years as chairman.

Alan was born in Denver but his parents moved to Covington in 1965 when it was a small rural town. Alan and his wife Stephanie reside in Gonzales and they have two daughters, Brooke and Allison. Most weekends you can find Alan on a golf course still trying to master the game.

D. SCOTT PHILLIPS, PE, PLS

Governor Bobby Jindal has appointed D. Scott Phillips, P.E., P.L.S., to LAPELS, effective April 4, 2014. Scott will serve a six-year term on the Board as a Professional Engineer from the practice of Industry.

Scott is a native of Monroe and graduated from Louisiana Tech with a degree in Civil Engineering, and he has an M.B.A. from Mississippi College. He is an active Civil Engineer and/or Land Surveyor in numerous states, including Alaska and Florida. In addition, he is a Certified Federal Surveyor (CFeds).

For the past ten years, Scott has served as the Mid-South Regional Engineer for Tensar International Corporation, the world’s leading manufacturer of geogrids. In this capacity, he is responsible for providing design and product support to engineers for industrial, commercial and roadway projects in Arkansas, Louisiana and Mississippi.

Scott began his professional career as a design engineer with Garver Engineers, in their Jackson, Mississippi, office. After several years there and longing for Louisiana life, he relocated back to north Louisiana, and was employed with French Engineering as a Project Engineer and Surveyor immediately prior to his current position with Tensar.

The Monroe Chapter of the Louisiana Engineering Society, of which he has served as the Professional Engineer in Industry representative for the past 5 years, nominated him for this appointment. Scott is an active member of ASCE, LSPS, and several other state societies in his industry territory, and he has served as an Adjunct Professor at Louisiana Tech.

Scott and his wife, Janie, have two daughters and one granddaughter, and reside on their farm outside of Mer Rouge. He is a commercial pilot and flight instructor, and in addition to hunting and fishing, enjoys spending his vacation time traveling overseas with his wife.
Thank you, the members of the Louisiana Engineering Society, for electing me to serve as your president. I regard my election as an honor and a privilege, and I regard it as a particular opportunity to serve the engineering profession. I must begin by giving sincere thanks to Alan Krouse who gave me my first opportunity to serve as a State Director on the State Board.

I must also especially thank Ron Rodi, who has served as the legislative committee’s chairman for longer than we deserved. I know you join me in lauding Ron for his years of service. He has just given his last report as committee chairman. My sincere hope is that Ron will enjoy his retirement, but not so much that we will not be able, from time to time, to interrupt his leisure so that we can enjoy his rich insights on the many issues that affect the engineering profession.

Ron’s retirement does give me the pleasure of introducing our new chairman on the legislative committee: Miles Williams. Miles just completed serving his term on LAPELS Board, and has now come to help LES in protecting and promoting the engineering profession. I look forward to working with Miles this coming year.

Looking back, our last year was very productive. We held the Tri-State Engineering Society Conference at the Beau Rivage in Biloxi, Mississippi. We must thank the many vendors, speakers, and attendees who joined us in Biloxi; and to the Mississippi Engineering Society (www.msengsoc.org), who took the lead on hosting the conference. Thanks also to David Hartley who spoke about manufacturing satellite propulsion subsystems in a fixed-price environment, and to Jim Curry from NSPE, who attended our meeting.

The NPSE also produced their final report, Race for Relevance, July 2013. I want to take four points from that report to emphasize this year:

- Recruitment and member retention;
- Effective use of social media; and
- Proactive political effort in issues directly affecting the engineering profession;
- Organizational culture in the 21st century.

Looking at our organization, LES claims 1,529 members. Our average age is 52. We are mostly Baby Boomers. In the August 2013 President’s message, Jason Thornhill noted that our membership was declining. To counter that trend, I am now announcing a recruiting contest. Let us see which chapter excels in recruiting, both in the total number of members and as a percentage of growth. The recruitment contest will end with the winning chapter being recognized at the 19th Annual JESC in January 2015.

Let me kick off the contest with these suggestions from Race to Relevance: As memberships come due for renewal, let other members of their chapter actively encourage renewals.

As we think about renewing memberships, we must also consider that with an average age of 52, our membership is also aging. In order to sustain LES, we must recruit new members from the younger generations, Millennials and Generation X, who live in a new and different world from the Baby Boomers. The Baby Boomers’ outlooks and values differ greatly from those of younger generations. Importantly, for them, the traditional methods of marketing have fallen by the wayside. For the younger generations, marketing means social media.

Social media also operates by its own rules, and we must learn and understand those rules. And here is a very important rule: Giving content away—for free—is the fuel that propels social media. Let me mention another rule that Monica Bussolati (www.bussolati.com) offered at the NPSE convention, a key...
A formula for effectively using social media. The formula is simply: 4-1-1

- Four: We use social media, promote other websites four times
- One: Promote yourself once
- One: Sell something once.

Among the many things we can sell, I think the most important is membership in LES.

On the other two points, I would like to challenge each chapter to be proactive in the political arena. Talk with the members of the Louisiana legislature, especially people who are on key committees who directly affect our profession. I strongly urge each chapter to make personal contact with someone in the fall, and then to make another contact during Engineers’ Week. We want to emphasize the importance of the engineering profession.

While the engineering profession remains vital, nothing survives without change. When Jamie Notter (www.jamie.notter.com) spoke about “Organizational Culture in the 21st Century” at the NSPE convention, he said that we must connect what is valued to what drives success. He said that organizations in this century must embrace decentralization, transparency, and experimentation. Organizations that have done so include Whole Foods (www.wholefoodsmarket.com), Zappos (www.zappos.com), and Google (www.google.com).

I want us to emulate those organizations, keeping those three traits in mind, changing how we do things as we work to retain and recruit new members, master the potential and promise of social media, and proactively involve ourselves into the social and political spheres that concern our profession. I ask that you contact your either your local chapter president or Michael Thomassie, LES membership chairman, if you have any further suggestions for improving membership.

Finally, I look forward to serving LES this year as we remain relevant and vibrant, and grow our organization for the future. Thank you all.

Spread the Word about LES!!!

Sponsor a new LES Member by inviting your colleagues to join you as a member of the only organization representing the interest of all engineering professionals.

- Invite them to join you at a chapter event
- Encourage them to visit the LES and NSPE websites
- Send the State Office a list of colleagues you would like to nominate for membership and we will send them a membership packet, with your name as their sponsor.

We appreciate your participation in membership recruitment!

For each new member that lists you as a sponsor, LES will send you a free gift!

You can choose from:
LES Tumbler • LES Umbrella • LES Polo Shirt

CONGRATULATIONS ON ACHIEVING A MAJOR MILESTONE IN YOUR ENGINEERING CAREER!

We would like to recognize your achievement and invite you to a Certificate Presentation Ceremony. This is a chance to be recognized for your achievement in front of your peers, and network with others in the Engineering Profession. We encourage you to invite family and friends to celebrate this monumental event. You may RSVP via email to les@les-state.org. Be sure to include your name, license number, & how many guests that will attend with you. You may contact Mrs. Brenda Gajan, LES Executive Director, at (225) 924-2021 or at brenda@les-state.org if you have any questions.

SOCIETY NEWS

Brenda Gajan, LES Executive Director

MEMBERSHIP COMMITTEE

Michael Thomassie, PE – mthomassie@ddgpc.com

I would like to start by thanking all those LES members who made a difference for the 2013-2014 LES year. The creation of the Student Chapter at LSU and addition of 163 ULL Student Chapter members were important accomplishments that should lead to long term members of LES.

A FEW THINGS IN THE WORKS FOR 2014-2015 INCLUDE:
✓ We are making an effort to get Public Sector Engineers more involved in LES.
✓ Craig Dooley announced a Membership Recruiting Contest in his Presidential Message.
✓ We making an effort to recruit Corporate Sustaining Members.
✓ Plans are in the works to establish a Fun event for all members. Details to follow in the next few months.

Please let me know if you have any ideas to improve the membership experience or recruit new members.

MNSPE IS OFFERING A FALL PE EXAM PREP COURSE AND REGISTRATION IS NOW OPEN

Upon registering, please let them know that you were referred by LES.
Access PE course information and online registration here: http://www.mnspe.org/pe-fe-exam-prep.html

Michael Thomassie, PE
Membership Committee Chairman
ALEXANDRIA CHAPTER
By Jennifer A. Gemar, PE

The summer months melted away at a record pace and we are now on the verge of another year. I want to give a special thanks to last year’s president, Luke Miller, along with all of our other officers and chairmen that worked hard to make it another successful year for the chapter. We hope to continue these efforts as we head into the new year. The 2014 – 2015 officers for our chapter are:

- President: Jennifer Gemar, PE
- 1st Vice President: Heath McGuffee, PE
- 2nd Vice President: Kyle Randall, PE
- Secretary-Treasurer: William Elliott, PE

Our year starts on September 9th with our first chapter meeting. The meeting will be held at the Westside Regional Library in Alexandria with plans to present on ethics. During this meeting LAPELS will also present the PE and EI certificates to newly licensed professionals. I encourage everyone to make an effort to attend the meeting and show your support as we congratulate them on their achievement. The rest of our meeting dates are as follows: October 7th, November 4th, December 2nd, January 6th, March 3rd, April 7th, and May 5th. If any of our chapter members are interested in speaking at a future meeting or have input on ways to better the chapter, please feel free to contact me. We are always interested in making improvements and will listen to any comments, critiques or feedback you may have.

I am looking forward to this year and serving as your chapter’s president. With your support and participation, I know we can make this another great year.

BATON ROUGE CHAPTER
By Chad A. Bacas, PE

I hope everyone has made time to slip in a little vacation or time away from work and enjoyed the summer before it comes to an end! I’m humbled and honored to serve as the incoming President of the Baton Rouge Chapter. I know that I will have some big shoes to fill from our Past President Chris Knotts. I would like to offer my great appreciation for what I have learned under his leadership. The new Board of Directors for the Baton Rouge Chapter is already hard at work and has started filling up our agenda for the upcoming 2014-2015 year with exciting events that makes LES the great society it is. I’m looking forward to working with our new Board of Directors listed as follows:

- President Elect: Jacob Loeske, PE
- Vice President: Shaun Sherraw, PE
- Secretary/Treasurer: Carolina Herrera, PE
- Directors: Lynne Roussel, PE and Kevin Beyer, PE
- Younger Member Chair: Michael Somme, PE
- Past President: Chris Knotts, PE

With the great success of our Corporate Sustaining Membership Program over the past 2 years, we will continue to offer this program looking for the same generosity from our Platinum and Gold sponsorship levels of $1,000 and $500, respectively. We know that without the support of the many companies in our community the missions of LES would not be possible or sustainable. This program not only offers great incentives to the companies participating, but also helps LES and its members stay active and prosperous in their engineering professions. One new feature of our Platinum level this year will be an added station sponsor for our annual Clay Shoot Tournament held in October.

Our other upcoming events for the year will begin with a joint LES/ASCE luncheon on August 21st. We are still lining up our speaker (possibly a representative from CPRA) for our September 25th meeting, but we have confirmed the presentation by LAPELS of the PE and EI certificates to the newly licensed professionals. In October, as mentioned previously, we will have our 3rd Annual Skeet Shoot Tournament on Friday the 10th. This is a great event to attend and offers a chance to warm up before duck season gets going! Also in October we will have our general meeting held on the 23rd, with our guest speaker Jeff Burst from LADOTD speaking on Design/Build Alternative Delivery Methods. Our typical Open-House Forum and Ethics Seminar at our annual LSU/SU Student Jambalaya Function will be held on November 6th. You may have heard that Richard Savoie retired from LADOTD, but we won’t let him retire from being the chef: great jambalaya! For our December 11th meeting, we are looking forward to a surprise new venue accompanied by a great speaker. Be on the lookout for more details to follow. I’m looking forward to seeing all of our members at these upcoming events. Please feel free to invite any potential new members so they can enjoy the same networking of people, programs and services that LES has to offer.

LAFAYETTE CHAPTER
By Ashley Simon, PE

The Lafayette Chapter Officers for the 2014-2015 year are:

- President: Ashley Simon, PE
- Vice President: Mark Aymond, PE
- Secretary: Liesl Boudreaux, EI
- Treasurer: Dr. Stephen Dufreche, EI

The chapter meetings will kick off in September with the Licensing Ceremony held in conjunction with an Ethics Presentation and luncheon. The meeting will be held at Don’s Downtown on September 23, 2014. We are eager to meet and welcome the new registrants.

We are excited for the upcoming year and are working on selecting meeting topics and presenters. Currently we are looking into touring the Energy Research Facility in Crowley, having a presentation on LEED building design and getting an update on the Louisiana Public Bid Law.

We are working to increase attendance at the monthly meetings and Chapter Membership. If anyone knows a potential new member or a member who has not attended a meeting before, encourage them to join us. Additionally, if any members have a suggestion on a topic, a presenter or even a new chapter activity, please contact one of the Lafayette Chapter officers.
As we begin this year with LES, I would like to thank the chapter leadership we have had over the past year and also welcome this year’s leadership team. Each individual has made a commitment to serve the Monroe Chapter membership by giving of their time and energy. The Monroe Chapter officers for the 2014-2015 year are as follows:

President: James S. Ellingburg, PE
1st Vice President: Brad Anzalone, PE
2nd Vice President: Brant Jones, E.I.
Secretary/Treasurer: Jody Smith, PE
Immediate Past President: Michael J. Pippen, PE

This group of officers will meet in early August to plan the monthly membership meetings and other events throughout this coming year. I would like to encourage any Monroe Chapter member to contact one of the officers if you have ideas or know of events that would benefit our membership as a whole.

Our first meeting of the year is scheduled for noon September 11, 2014. Additional details about the meeting will be included in the chapter newsletter to be sent out prior to that date. We will have individuals with the State LES office and LAPELS Board Members in attendance to conduct a Licensing Ceremony for new registrants in our Chapter. Meetings throughout the year will be the second Thursday of each month beginning at noon, and will feature a technical topic that will be presented by a guest speaker. One (1) PDH will be awarded to each member who attends.

In response to a June 15, 2014 Times Picayune article titled “UNO looks at eliminating some academic programs,” we sent a letter to Dr. Peter Fos, President of the University of New Orleans, on behalf of the New Orleans Chapter of the Louisiana Engineering Society urging the University of New Orleans to keep all of its engineering curricula as currently offered. We emphasized that UNO engineers are in high demand, and with South Louisiana on the cusp of a significant industrial and economic expansion, the demand for engineers in our region will only expand. Although we understood that the University is facing a budget squeeze, we urged Dr. Fos, the Deans, Administrators, and Faculty not to curtail the engineering programs which are and have been for many years one of the University’s hallmarks. Dr. Fos was very gracious in his response and indicated that he had expressed his concerns with Dr. Fos. Michael Smith, Vice President of Engineering with PEMBA Lighting & Automation, Inc. has also written to Senator Alario in support of the UNO engineering programs. We will expand our effort to gain further champions in both the Louisiana House and Senate. The region cannot exist or advance on tourism alone.

If you or your company would like to assist in this effort to show support for continuing and even expanding the engineering programs offered at the University of New Orleans, please let us know, and feel free to write to Dr. Fos and/or to your local State House or Senate member urging such support.

As the Chapter moves forward, we will meet for an annual Planning and Reassessment Retreat on August 16, 2014. There we will look at where we have been over the past year, what we have done well, what we can improve on, and how we can provide value so that we remain relevant to the interests, desires, and needs of our members.

On our website, www.no-les.org, is a tentative listing of our meeting/event dates; we will be alternating with luncheon and evening meeting, so that we may draw good audiences and provide timely, relevant programs, all in cooperation with various speakers who may be available only at certain times. We will fill in the blanks as to projected speakers, times, locations, and specific events during the August Retreat.

We look forward to a dynamic 2014-2015!
The National Society of Professional Engineers (NSPE) has named Theodore H. Thompson, PE, F.NSPE, to its 2014 class of Fellow Members. The Fellow membership grade honors Professional Engineers who have demonstrated exemplary service to their profession, society and their community. Since its creation in 2000, less than one percent of all NSPE members have advanced to this highest membership rank.

Ted is currently semi-retired working part-time for Guinn Construction, LLC of Jennings, Louisiana and also as an adjunct faculty member at McNeese State University, where, since 2000, he teaches one to three engineering courses a semester. He retired from F. Miller & Sons, LLC/F. Miller Construction, LLC a general contractor in Lake Charles, LA, in 2009, where he worked for thirty-five years; starting as a field engineer and working up to head of the company.

He is a Vietnam veteran, retiring in 1999 as a Lieutenant Colonel with 29+ years of service on active duty, National Guard, and US Army Reserve.

Ted is currently chairman of the LES Ethics committee and has chaired several other committees over his tenure, while holding the positions of Lake Charles Chapter President for five times and LES President. He continues to serve the profession and Louisiana as a member of the LAPELS board, currently serving as vice chairman. Ted also volunteers his time at the national level by serving on the NCEES FE Exam committee and the NCEES EPE committee.

He thanks the LES board for his nomination and is humbled by the honor. He has always encouraged LES members and his students to give back to their school, profession, and community, which have made them successful.

His interests are many and include teaching, FE Exam question writing, attempting to stay out of the woods and sand, while playing golf, model railroading, collecting dining car china, flying, and his grand daughters to name a few. He and his wife of 47 years, Martha, reside in Sulphur, LA.

Members of the board of LES attended the NSPE Annual Meeting in Washington, DC, that was held July 1-6, 2014. Attendees included Craig Dooley, President; Heather Klingman, First Vice-President; Susan Richard, NSPE Representative; Alan Krouse, PEPP Chairman; and Chris Richard, NSPE PEPP Chairman. The meeting was very well attended and included leadership tracks for state leaders in attendance as well as professional development offerings. The conference included time for attendees and their families to enjoy the Independence Day activities offered at the nation’s Capitol.

The Board of Delegates meeting included adoption of the Strategic Plan developed by NSPE through several years of subcommittee work. The Plan is an initiative outlining the direction of NSPE to achieve relevance to the engineering community, to improve service to its members. The meeting also included elections of the Member at Large and Vice President. Neil Wright of Virginia was elected as Member at Large; Kodi Jean Church of Minnesota was elected Vice President. Congratulations to these dedicated professionals.

NSPE continues to reach out to members to find out “what NSPE can do for you.” NSPE invites all members to join us at the next annual meeting in July 2015 in Seattle, Washington. More details will be posted in early 2015 at their website www.nspe.org.
The 2014 Regular Legislative Session officially ending June 2th. The session again consisted mostly of budgetary and educational debates with a few bills that impacted the engineering profession. LES continues to be respected as a leader in promoting professionalism in the laws affecting all engineers and our responsibility to protect the health, safety and welfare of the public.

This session LES partnered with ASCE, ACEC, The Good Roads Coalition and others in an Infrastructure Awareness Day at the Legislature, an event that we will likely continue to help sponsor and nurture.

Following is a summary of the bills that were tracked and their current status:

<table>
<thead>
<tr>
<th>Bill</th>
<th>Disposition</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SB 158</td>
<td>Deferred</td>
<td>Provides for the licensure of professional engineers currently licensed in other jurisdictions</td>
</tr>
<tr>
<td>SB 341</td>
<td>Signed by Governor</td>
<td>Provides for limitations relative to actions or rules requiring modification of certain existing community water systems</td>
</tr>
<tr>
<td>SB 416</td>
<td>Deferred</td>
<td>Provides relative to the Louisiana Professional Engineering and Land Surveying Board; ACEC bill to add two seats</td>
</tr>
<tr>
<td>SB 468</td>
<td>Signed by Governor</td>
<td>Provides relative to contracts for public bid law changes</td>
</tr>
<tr>
<td>SB 680</td>
<td>Signed by Governor</td>
<td>Provide for CM@Risk method for public contracts.</td>
</tr>
<tr>
<td>HB 137</td>
<td>Deferred</td>
<td>Authorizes payroll deductions for dues for membership in the Louisiana Engineering Society</td>
</tr>
<tr>
<td>HB 319</td>
<td>Signed by Governor</td>
<td>Revisions to business corporation law; specific references to the use of terms “engineer”, “architect” or “surveyor”</td>
</tr>
<tr>
<td>HB 964</td>
<td>Deferred</td>
<td>Provides for overhead power line information identified on Dept. of Transportation and Development public work projects</td>
</tr>
</tbody>
</table>

Ongoing items:
1. Continue to work with ACEC and the state Ethics Board to provide an opinion on how private practice engineers are treated under the Louisiana Code of Governmental Ethics;
2. Re-submit our LES bill to approve a payroll deduction for state-employed engineers to pay their LES dues;
3. Work with LAPELS on licensing requirements for licensed engineers from other jurisdictions;
4. Continue working with Louisiana’s DHH to draft the standards for water system design; and
5. Continue to monitor an initiative to require the inclusion of overhead power lines on plans for public works projects.

Having served my last term as Chairman of the State Legislative Committee, I am honored to have represented LES and the engineering profession overall on many interesting and sometimes challenging issues. I can’t say enough about Gerald Simmons’ continued contributions to our legislative efforts. His wisdom, advice and “know-how” have been essential for us in tracking bills, developing legislative strategies and setting up meetings with legislative leaders. The legislative activities are a team effort with strong leadership and decision-making by the Board of Direction; Chapter legislative committees connection to legislators in their communities; member participation to provide testimony and the Stae Office's role in with the general membership as well as assisting in compilation of materials and related information.

LES 2015 HONORS & AWARDS
Brenda Gajan

LES will honor eight engineers who have achieved high levels of professionalism, technical ability or civic support. The desire of the Society is not only to recognize the distinguished service of these individuals, but to also encourage and inspire other engineers to take a greater interest in their specific field. Please give serious thought to nominating someone in your professional area of expertise for one of the awards listed below. Nominations should be made through your local chapter and are due to the State Office by November 7, 2014. The eight categories are:

1) A. B. Paterson Medal for an Engineer in Management
2) Andrew M. Lockett Medal for Civic Activities
3) James L. Todd Technical Accomplishment Medal
4) Leo M. Odom Award for Service to the Profession
5) Charles M. Kerr Public Relations Award
6) F. Hugh Couglin Young Engineer Award
7) Waldemar S. Nelson President's Award
8) Dudley Hixon – Bobby Price National Professional Achievement Award
It is an honor to serve as the Louisiana Engineering Foundation President however it will be impossible for me to accomplish in my tenure what Chris Richard accomplished in his term. Prior to Chris taking over as President we had a mortgage on the Engineering Center and the budget was covering all the expenses but not reducing the principle. Chris developed an ambitious five year plan to pay off the building in conjunction with creating scholarships. In our initial meeting to discuss the plan we were thinking we would get numerous small donations and a dozen scholarships established via $10,000 donations. Well needless to say we underestimated how generous companies and individuals would be! We paid off the building last year and to date twenty three scholarships have been established. Thank you Chris and thanks to all who donated to make this possible. The other new LEF officers are Jason Thornhill Vice President, Susan Richard Director, John Plaisance Director, Sec.-Treas. Byron Racca, Past President Chris Richard and all LES Chapter Presidents.

For a list of the established scholarships please see the LEF website. Also on the website is a link for students to fill out a scholarship application online so if you know of someone who is interested please share this with them. One additional piece of news to share is that we have added a new tenant to the Engineering Center Building, The Louisiana State Board of Professional Geoscientists.

Protecting your community’s drinking water has never been more important than NOW.

The Drinking Water Revolving Loan Fund (DWRLF) is providing low interest loans and technical assistance to public water systems in Louisiana.

Learn if your water system is eligible, and how to apply to today!

### 2014 Tri State Annual Meeting Highlights

#### Thank You to the 2014 Tri-State Exhibitors & Sponsors

**LES** would like to recognize the following companies for their support at the 2014 Tri State Annual Meeting held at Beau Rivage Resort & Casino in Biloxi, MS:

**EXHIBITORS**
- Advanced Drainage Systems, Inc.
- Alabama Board of Licensure for PE & PLS
- Bagley College of Engineering - MS State University
- Brand Energy Solutions, LLC
- Carneuse Lime & Stone
- Cardno TBE
- The Crom Corporation
- Delta Process Equipment

**GOLD SPONSORS**
- Alabama Asphalt Pavement Association
- Cardno TBE
- Gresham, Smith & Partners
- Jordan, Kaiser & Sessions, LLC
- Louisiana Pavement Association
- Mississippi Asphalt Pavement Association
- MSU, Bagley College of Engineering
- Neel-Schaffer, Inc.
- Waldemar S. Nelson & Company
- Stantec

**SILVER SPONSORS**
- Dunn Roadbuilders, LLC
- ITS Regional, LLC
- Lazenby & Associates, Inc
- Michael Baker Jr, Inc
- Waggoner Engineering, Inc
- Yates Engineering

**BRONZE SPONSORS**
- Kean Miller, LLP
- UPS

**SILVER SPONSORS**
- Gulf Coast Underground
- Huesker
- K&K Systems, Inc.
- Mississippi 811, Inc.
- Oldcastle Precast
- Premier Concrete
- Southeastern Tank, Inc.
- Storm Services

**GOLD SPONSORS**
- G360, LLC
- Sunbelt Sealing, Inc.
- T.A.W. Power Systems, Inc.
- Taylor Power Systems, Inc.
- Tensar International Corporation
- Terracon
- Tesco Controls, Inc.
- Tnemec/Technical Coatings Services
- TOPCOR Services, LLC
- UPS
- Vector Graphics, Inc.
- Vista Engineering
- Yates Engineers

### Save the Dates

Mark your calendars for the 2015 JESC & Tri-State Conferences!!!

- January 28-29, 2015 @ the Hilton Lafayette
- June 27-30, 2015 @ the Sandestin Resort - Destin, FL
Louisiana Engineering Society presents:
Three 8hr Life Safety Code Seminars
by Robert Miller
The Building Code Institute, LLC

September 15, 2014
8:00am – 4:30pm
Courtyard Marriott
Shreveport, LA

September 17, 2014
8:00am – 4:30pm
Embassy Suites Hotel
Baton Rouge, LA

September 19, 2014
8:00am – 4:30pm
Courtyard Marriott
Covington, LA

Earn 8 PDH’s at each Seminar!!

This one-day 8 hour credit seminar for the year 2014 will focus on the Significant Changes to Life Safety Issues of the newly adopted 2012 editions of the NFPA 101 Life Safety Code and the International Building Code.

The seminar will address the changes related to new construction and existing facilities related to:

- Occupancy Classification,
- Components serving Means of Egress related to specific Occupancies
- Construction and Fire and Smoke Barriers,
- Compartmentation and Firestopping,
- Life Safety Systems such as Fire Alarm and Sprinkler systems, and
- Accessibility requirements

A workbook will be provided which can be used for future reference of the issues covered in the seminar.

Below is the REGISTRATION FORM. Please check the seminar you would like to attend.

☐ September 15, 2014 in Shreveport  ☐ September 17, 2014 in Baton Rouge  ☐ September 19, 2014 in Covington

Name: ____________________________________________
Address: ____________________________________________
City: ______________________ State: ___________ Zip: ________
PhoneNumber: __________________ FaxNumber: __________________
Email: ____________________________________________

REGISTRATION:  ☐ Society Member $215  ☐ Non Member $265  ☐ Visa ☐ M/C ☐ Discover
(We do not accept American Express)
(Lunch is included in registration cost.)
Card No _______ Exp Date _______

Signature: ____________________________________________

Mail checks and registration to: LA Engineering Society, 9643 Brookline Ave., Ste. 116 Baton Rouge, LA 70809
You may fax your registration to: (225) 924-2049 or email to les@les-state.org
For more information please visit our website: www.les-state.org
If you have any questions, please call the LES office at (225) 924-2021

Sorry, no refunds will be given after August 31, 2014
Seating is limited to 30 participants at all seminars, so register now!!

Call the Courtyard Marriott in Shreveport (6001 Financial Plaza, Shreveport, LA 71129) at 318-686-0545 for room reservations
Call The Embassy Suites Hotel (4914 Constitution Ave, Baton Rouge, LA 70808) at 225-924-6566 for room reservations
Call the Marriott Hotel in Covington (101 Northpark Blvd, Covington, LA 70433) at 985-871-0244 for room reservations
An introduction to NFPA 101, the Life Safety Code, for architects and engineers less familiar with the content and intent of the code; The 8 hour class room instruction will cover the major provisions of the 2012 Life Safety Code, with focus on the following chapters:

- Core Chapters 1 thru 11
- Building Rehabilitation, Chapter 43
- Occupancy Chapters
  - Assembly
  - Health Care
  - Residential
  - Business

The significant changes that have occurred in the Life Safety Code since the 2009 edition will be pointed out to the attendees, such as:

- New definitions
- Elevators for occupant controlled evacuation
- Normally unoccupied building service equipment support areas
- Rewrite & expansion of Ch. 8 provisions on opening protective
- Carbon monoxide detection
- Health Care chapter provisions to make more homelike

Attendees should have a basic level of code knowledge, and basic understanding of the structure, goals and objectives of such codes. Presentation will be in the form of PowerPoint slides and verbal instructional discussions. It is highly recommended that attendee bring a copy of 2012 NFPA 101 to this class.

Attendees will learn:

- Recommended method on the use and application of the Life Safety Code.
- Background on the code intent.
- Major changes that have occurred in the 2012 Life Safety Code.

The following is a graphic illustration of the history of LES. These illustrations are reduced versions of the display panels that were on exhibit during the Society’s Centennial Celebration and are now on permanent display in the Waldemar S. Nelson, PE Conference Room in the Louisiana Engineering and Surveying Center.

**A PICTORAL HISTORY OF LES**

**THE FORMATIVE YEARS**

1897 - 1907

- First organizational meeting was called by J. F. Coleman and held at Gallier Hall in New Orleans on December 22, 1897.
- The purposes of the Louisiana Engineering Society are for the professional improvement of its members and for the advancement of the engineering profession.
- Charter signed by 29 original members and recorded on February 3, 1898.
- Sidney F. Lewis elected as the first LES President in 1898.
- Work begun on passing a law to regulate the practice of engineering and land surveying.
- Membership growth continues.
- A Library Committee is established to secure books and periodicals for the use of all members.
- First office established at 712 Union Street in New Orleans.

15 PDH's for $500
A time for reflection and looking forward

The calendar says we are still in summer, but for the American Council of Engineering Companies of Louisiana, it’s the beginning of a new year with a new Board of Governors and new objectives to meet. It’s also an appropriate time to review our accomplishments of the last 12 months as we look forward to the challenges that lie ahead.

Transportation remains a large part of our members’ workload, and ACEC/L initiated a project with the state Department of Transportation and Development to improve the consultant process. Together, we formed several working committees of ACEC/L and DOTD representatives to examine all aspects of the consultant relationship – procurement, contracting, program administration and claims. These committees made recommendations on improving each of the areas under their charge, and those recommendations were presented to the overall group.

Anyone who has worked with DOTD – or nearly any government agency – understands that change takes place slowly, in small increments. In that context, however, we were successful in arriving at several agreements with the DOTD representatives to make the processes more efficient and fair. Those agreements and recommended changes ultimately were presented to DOTD Secretary Sherri LeBas late last year, and we continue to work with DOTD to implement these improvements.

On the legislative front, ACEC/L was well represented on several issues, including:

- Participation on the design-build task force committee (SCR102 2013 session)
- Participation on the overhead power line study committee (HCR148, 2013 session)
- Construction at risk bill (SB 680), which was passed during the 2014 session
- Revisions to public bid law in partnership with AGC and AIA during the 2014 session

Despite our successes, ACEC/L is hardly content. Indeed, one of the most frustrating issues I have encountered as Executive Director is the difficulty we have in the political arena. This is especially true when it comes to transportation funding, the most important part of our industry’s public sector work. The state Transportation Trust Fund will take an additional $60 million hit this fiscal year by paying operational expenses for state police – an expense that traditionally has come from the state’s general fund. Our friends in the legislature are sympathetic to our plight, but sympathy doesn’t pay the bills. This is why one of the most significant accomplishments during 2013-14 was the Board of Governor’s authorization for ACEC/L to create a political action committee.

Many of our member firms carry some influence in the political arena, but our ability to affect real change that would benefit our industry is limited because our political power is diffused. The ACEC/L PAC is a move in the right direction to harness our collective political influence to make real and lasting systemic changes that will benefit our industry. With a concerted lobbying effort backed by the power of a well-financed PAC, my hope is that we can start making real progress on transportation and other issues important to our industry.

On the public relations front, ACEC/L had a very active year. In May, ACEC/L teamed up with ASCE, Louisiana Good Roads and LES to sponsor the first Infrastructure Awareness Day, and opportunity for our collective members to discuss important infrastructure matters with members of the legislature. This was an important first step for us, as an industry, to utilize our expertise with legislators to inform them of the dangers of not investing more resources into the building blocks of our society. Other public relations activities include volunteering at the Zurich Classic golf tournament in New Orleans to raise money for children’s charities and sponsoring a UNO video to educate the public on the importance of millage taxes and improvements to the wastewater and sewerage systems.

We also will be making some enhancements to the ACEC/L website in the coming year and hope to be able to utilize the site as a marketing tool to potential members as well as serving as an information portal.

ACEC/L also worked on several “behind the scenes” items that are important to the work our members do. Some of these issues include:

- Continuation of adopting the NCEES definition of engineering with LAPELS
- Working with LAPELS on discontinuing the writing of investigative aids
- Working with the state Department of Health and Hospitals to change language on the Certificate of Completion form
- Working with LES on the definition of “incidental work” to prevent the State Fire Marshal’s Office from accepting plans stamped by architects

In summary, this was a busy year, and we know we have many issues and challenges ahead of us. A special thanks to Sergio Girau, P.E., for his leadership this year. Sergio has been a very active president and is one of the driving forces behind many of the initiatives listed here. We also wish our incoming president, Brad Graff, P.E., all the best and pledge to work closely with him. Our organization works only if you help us make it better. We appreciate your membership in ACEC/L and do not hesitate to contact us if we can be of assistance.

Southeastern Tank is the most trusted supplier of tank solutions in Louisiana. As an authorized distributor for CST Storage, Southeastern Tank offers its customers the best glass-fused-to-steel and epoxy coated storage solutions available.

With over 25 years serving the market, Southeastern Tank has the experience and expertise to specify, design, construct and service the Aquastore® or HydroTec® tank that best fits your application.

There’s a reason Southeastern Tank has over 500 installations in five states. With the right products, best construction methods, and customizable fabrication, Southeastern Tank can deliver world class storage solutions to satisfy your local needs.

Nikon’s Nivo™ Series
Nivo M and Nivo C

Designed with high productivity in mind

FEATURES:
• Survey Pro software on-board Nivo C Series
• Windows CE touch-screen on Nivo C Series
• High quality Nikon optics
• Fast, accurate EDM
• Prism and reflectorless measurements
• Easy 2nd face keypad is optional
• Hot swappable batteries
• Compact, rugged, and lightweight
• Cable-free Bluetooth®
• Available in 2”, 3” and 5” models

Series includes:
— Support for USB memory sticks
— Wireless cable-free Bluetooth connections to external data collectors
— A USB High-speed data transfer
